The HunterNet Future Leaders Program is uniquely designed to take our region's developing professionals to the next level through exposure to industry leading presenters, cross-functional networking, and a competitive scenario-based project experience.

The dynamic workshop sessions invite participants to share their individual experiences across various sectors, and interact directly with industry-leading presenters, allowing the participants to exclusively leverage mutual knowledge.

A key aspect of the Program is the major project where the participants form multi-disciplinary teams and work within a competitive business environment on a topic relevant to the business world today. During the Project, teams are mentored by industry leading professionals and collectively present to a judging panel consisting of prominent business executives.

This Program allows Hunter businesses to not only invest in the future of their developing professionals, but safeguard the continued success of their business.

Each year this Program grows from strength to strength, with 2024 Program places already limited! Get in quick to secure the leadership development opportunity of a lifetime.
