

Oceanex Energy invites you to meet our project partner Equinor.

Our collaboration will combine Oceanex's local knowledge and experience gained over the last decade with Equinor's world-leading offshore experience and pioneering role in the development of the Novocastrian Offshore Wind Farm.

The Oceanex and Equinor integrated project team will host an evening for key regional stakeholders to learn more about floating foundation technology and the significant opportunities for the Hunter Region.

We will also launch our project website and demonstrate how local suppliers can register for project opportunities.

The Event

Please join us for a drink and canapes

🕒 3:30pm to 5:30pm

📅 Tuesday 18 October 2022

📍 Noah's on the Beach, 29 Zaara St Newcastle

📧 Please RSVP via <https://trybooking.com/CCVXZ> by 7 October 2022.

About Equinor

Equinor is a broad energy company building a material position in renewable energy. The company, headquartered in Norway, is developing offshore wind clusters in the UK, the US Northeast and in the Baltic Sea and is positioned for future wind options in several geographies, including the Asia & Pacific regions where it is developing a pipeline of floating offshore wind projects in South Korea.

Equinor is the world's leading floating offshore wind developer and operator, operating the world's first floating wind farm, Hywind Scotland (30MW) and soon Hywind Tampen (88 MW) off the coast of Norway which when in operations within 2022 will be the world's largest floating offshore wind farm.
