Isla Hartigan - Quarry Mining

Isla Hartigan - Isla joined Quarry Mining in 2019 and was a first year fitter machinist apprentice in 2020. Isla finished her TAFE studies last year and passed with flying colours. She is a valued and respected member of our fitting department which has a close knit team of 9 and is now tasked with many of the highly technical jobs. She enjoys a varied workload and is grateful for her mentor Keith who she values and continually learns from.

Mikayla Watson - Robotic Systems

Mikayla has a Certificate II in Electronics, and was acknowledged by the head teacher as one of the highest performers in the cohort. At Robotic Systems Mikayla is the manufacturing product owner for medical research devices as well as advanced mining technology.

Nicole Clifton - Regal Rexnord

Hi my name is Nicole Clifton, I am 21 years old I love soccer, motorsports and camping. I'm completing an Engineering Mechanical trade, I'm a fitter machinist at Regal Rexnord. I have almost finished my first year of my apprenticeship and I love every bit of it. The main stuff I work on is inspect, fix and rebuild gearboxes. I can be building brand new gear boxes, but I also work on ones that have been in service for years at mine sites or different companies all over Australia, and the world. I am also the only female, and the first female to be working in workshop as well. My drive to be in this industry is a lot to do with my dad who is a process engineer at Yancoal at Mt Thorley. His knowledge and experience has inspired me to be like him one day so being in this field of work is the best start to my career.
